Monthly Jobs Report

Revised July and Preliminary August Jobs Figures Released

INDIANAPOLIS (September 13, 2006) – The number of jobs in Indiana is now 24,800 higher than this time last year according to figures released today by the Indiana Department of Workforce Development.

Indiana's seasonally adjusted job figures indicate a revised July total of 2,979,500 jobs while preliminary figures for August indicate 2,977,300 jobs.

The payroll employment statistics used in the jobs report is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.

Seasonally Adjusted Figures

The nation's seasonally adjusted figures for August show that U.S. employment grew moderately over the month. Education and health services added a significant number of jobs while manufacturing and trade declined. Over the year, employment is higher by 1.7 million jobs with increases in almost all sectors.

Meanwhile, Indiana remains approximately 36,600 jobs off its peak, which was reached in May of 2000. The number of jobs in Indiana according to July revised data was 2,979,500, whereas August preliminary figures were 2,977,300. Seasonally adjusted employment declined slightly in August losing 2,200 jobs after gaining a similar amount in July.

Among the eleven super-sectors, three gained, six lost and two remained unchanged. Education and health services, leisure and hospitality, and construction posted modest declines while most other sectors experienced little change. Government employment rose by 1,600 with the increase concentrated in local government education. Almost all sectors contributed to an over-the-year gain of 24,800 jobs.

Non-Seasonally Adjusted Figures

Indiana's August preliminary non-seasonally adjusted payroll estimates indicate 2,956,100 jobs for the state, while July's revised total reported 2,946,600 jobs. Employment is higher by 15,700 when compared to one year ago. Unadjusted employment growth was about half of the most recent 10 year trend. Lighter than normal factory shutdowns in July resulted in fewer workers being recalled in August. Similarly, a later than normal start to the school year at many private schools most likely accounts for the downturn in education and health services.

Non-Seasonally Adjusted Metropolitan Statistical Areas

Preliminary job figures in the state's Metropolitan Statistical Areas (MSA) for June, with last month's and last year's job numbers:

MSA	August 06	July 06	August 05
Anderson	43,600	42,600	43,800
Bloomington	77,500	78,200	77,000
Columbus	43,500	43,200	43,500
Elkhart-Goshen	132,100	131,300	130,200
Evansville	180,600	180,000	178,200
Fort Wayne	216,900	215,400	214,700
Gary	276,900	276,900	274,200
Indianapolis	891,800	885,500	892,900
Kokomo	47,100	47,000	47,800
Lafayette	89,600	89,400	89,600
Michigan City	47,600	47,600	46,800
Muncie	49,500	49,400	50,500
South Bend	145,500	145,700	144,100
Terre Haute	73,300	72,900	72,200

The Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with Indiana's 26 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs and closures and operates a statewide job placement service.

Technical Notes:

- Payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.
- The survey that calculates the payroll employment estimate is conducted by the U.S. Bureau of Labor Statistics and is conducted during the week of the 12th of the month.
- In calculating employment figures, two different types of calculations are provided. The first, *non-seasonally adjusted*, provides information without taking into account the effects of seasonal trends. In calculating the *seasonally adjusted* information, employment that follows more or less a regular pattern each year, including holiday or summer employment is factored out of the estimate. The adjustments make it easier to observe the cyclical and other non-seasonal movements.
- For the most accurate analysis, please use revised data sets and not preliminary estimates.

-30-

Note to media: There have been inquiries regarding the difference between jobs and employment releases provided by the Department of Workforce Development. The following definitions outline the differences between these two statistical measurements.

- *Jobs (release date: September 13, 2006)* Job statistics are provided by the U.S. Bureau of Labor Statistics, derived from a survey of payroll records. As a payroll survey, it is based on an individual's place of work and includes industrial classifications. It includes non-farm wage and salary reports, but does not include self-employed, business owners and farm workers.
- *Employment (release date: August 23, 2006)* Employment statistics are provided by the U.S. Bureau of Labor Statistics, derived from a household survey. As a household survey, it distinguishes whether an individual (counted once) is employed or unemployed, even if that individual has more than one job. The unemployment rate is calculated from these same statistics.
